ADITYA YELLAMRAJU

Senior Product Designer | AI | Platform & Enterprise Systems
adityaydesign@gmail.com · linkedin.com/in/aditya-yellamraju · aditya.design

SUMMARY

Systems-minded Senior Product Designer with 9+ years driving design & strategy for complex, AI-powered enterprise platforms at scale. Proven track record of identifying uncharted product opportunities, translating ambiguous platform challenges into cohesive, scalable experiences, and influencing roadmaps through executive-level storytelling. Deep expertise in foundational personalization and analytic platform capabilities across multi-product ecosystems. A proactive cross-functional partner who thrives in ambiguity, mentors design teams, and raises the quality bar across the organization.

DESIGN EXPERIENCE

Senior Product Designer | **Salesforce** | Austin, TX *July 2021 – Present*

- Led 0→1 design strategy and end-to-end execution for Salesforce's Personalization Core Platform, a net-new foundational enterprise system built from the ground up to serve enterprise users at scale across Marketing Cloud and the broader Salesforce ecosystem, uniting disparate product surfaces into a cohesive, scalable experience.
    - Owned design for foundational platform capabilities: Agentic Recommendations Engine, Decisioning Frameworks, Experimentation Infrastructure, Analytics & Insights, and Engagement Signals which led to translating complex backend systems into intuitive user-facing workflows.
    - Vibe-prototyped core platform flows using Claude Code, Cursor and Figma Make, rapidly generating and iterating on high-fidelity, AI-assisted prototypes to explore emerging interaction models and pressure-test ideas before engineering handoff.
- Shaped design strategy for Tableau Pulse, a generative AI-powered data storytelling and analytics product that redefined how business users access and understand data. Shipped key features including Metrics Digest Emails, Pulse Homepage, and adaptive personalization workflows.
    - Led 0→1 design for Project Nexio, a generative AI insight discovery initiative; ran design sprints, built high-fidelity prototypes in Figma, and partnered cross-functionally to validate novel AI-powered user experiences.
- Delivered post-acquisition integration of Narrative Science into Tableau, launching Data Stories, one of Salesforce's first NLG-powered data features, demonstrating ability to unify acquired and native platform experiences.
- Presented design strategy and concepts to senior leadership, crafting data-informed narratives to build alignment across global teams and drive long-term roadmap investment.
- Mentored designers through workshops and critiques, modeling a culture of systems thinking, inclusive design, and design excellence across the broader organization.
- Selected for Salesforce's Accelerate Program, a competitive internal leadership and management development program —recognized for cross-functional impact and potential for organizational leadership.

UX Researcher | **PeopleGrove** | Chicago, IL *Feb 2021 – June 2021*

- Conducted end-to-end mixed-methods research (interviews, surveys, heuristic evaluations, usability testing) for a customer education and peer networking platform.
- Synthesized findings into actionable design recommendations that shaped product priorities and directly influenced roadmap decisions.

Lead UX Designer & Founder | **AY Design Consulting** | Bangalore, India *Oct 2015 – Jul 2018*

Independent practice designed for e-commerce, HR-tech, sustainability, travel

- Founded an independent UX consulting practice, leading end-to-end design for startups across multiple industries, defining strategy, conducting research, and shipping scalable product experiences.
- Led full redesign of The Flying Squirrel Coffee's e-commerce platform: restructured IA, ran design sprints in Sketch & InVision, and collaborated with engineering to increase online sales by 80%, triple web traffic, and improve checkout success rate from 25% to ~60%.
- Delivered UX strategy for SpringRole (HR-tech), Birdwing (travel), and Saahas (non-profit), applying card sorting, IA testing, and usability research to measurably improve user task completion and business outcomes.

EARLIER CAREER — CREATIVE & DIGITAL INDUSTRY (2010–2015)

Roots in India's creative and digital agency world — where design, data, and client strategy converged naturally into a UX-focused career path.

- Progressed through design, account management, and strategy roles at Origami, Interactive Avenues, Maxus, and Techno Brain — building fluency in the full creative process from brand and digital ad production to website design, wireframing, and content strategy.
- Managed 7+ client relationships across automotive, FMCG, and tech industries — gathering requirements, running design sprints, and delivering digital artifacts (websites, landing pages, ad campaigns) that drove measurable business outcomes including a 20% lift in website traffic and 1,000+ test drives for top automobile manufacturers.
- Conducted A/B testing on landing pages, ads, and emails using Google Analytics and Hotjar — an early grounding in data-driven, evidence-based design thinking that carried directly into UX practice.
- Led consumer insight research (surveys, user interviews, field studies) to inform digital communication strategy — a natural precursor to UX research methodology adopted later in career.

EDUCATION

M.S., Human-Computer Interaction (HCI) *November 2020*

DePaul University, Chicago, IL

B.E., Information Science & Engineering *June 2009*

SIR. MVIT, Bangalore, India

CORE SKILLS & TOOLS

Design Practice: Platform & Enterprise UX, 0→1 Product Design, Design Systems, AI/ML Experience Design, Experimentation Frameworks, Personalization, Accessibility & Inclusive Design, Systems Thinking

Strategy & Leadership: Design Vision & Roadmap Influence, Executive Storytelling, Cross-Functional Alignment, Design Sprints, Mentorship & Coaching, Workshop Facilitation

Research & Analytics: Mixed-Methods UX Research, Data-Driven Design, Usability Testing, Customer Feedback Synthesis

Tools: Figma, Cursor, Adobe XD, Framer, Principle, Axure RP, Sketch, InVision, Miro, UserTesting, Optimal Workshop, Webflow, Google Workspace
